

IsisCB Explore

Please consider adding the IsisCB Explore History of Science Index (isiscb.org/explore) to your list of historical reference resources.

Accessible to anyone on the web, IsisCB Explore is a completely open access service made possible by the History of Science Society with support from the University of Oklahoma.

IsisCB Explore opens up bibliographical research in the history of science, technology, and medicine. It is designed for students, scholars, librarians, and the general public. Users will find the data architecture intuitive and powerful, and librarians can trust that it will guide researchers to the best literature in the discipline.

Based on the 100-year-old Isis Current Bibliography of the History of Science—the largest and most comprehensive in its field—it is supported by the discipline's flagship society, the History of Science Society. It will be expanded and updated annually.

Key features include:

- * Nearly 200,000 interlinked bibliographic citations to books, chapters, articles, dissertations, and reviews from the Isis Bibliography of the History of Science 1974 to present. Annually updated.
- * An authority index of over 150,000 curated entries. Includes historical concepts, persons, and institutions. Also indexes scholars, publishers, journals, and degree granting institutions.
- * A navigation interface built specifically for history of science research. Enables focused searches on ancient, medieval, modern and non-Western topics.
- * A state-of-the-art network architecture with complex interlinking of citation and authority records.
- * Integrated social media tools, including public user comments as well as Twitter and Facebook sharing.
- * User accounts with the ability to save searches.
- * Zotero integration. Allows users to save individual citations as well as collected results.
- * Automated access, with a REST API.
- * A search widget for your website.
- * Coming soon: A link resolver, giving library patrons immediate access to your library's holdings.
