Edelstein Award

The Edelstein Award for Outstanding Achievement in the History of Chemistry was given from 2002 through 2009. Following Sidney M. Edelstein's death in 1994, the Dexter Chemical Corporation continued to sponsor the Dexter Award until 1999. Afterwards the Edelstein family decided to continue the award and provided the major funding for the award, which was renamed "The Sidney M. Edelstein Award for Outstanding Achievement in the History of Chemistry". The newly named award was established in 2002 and was cofunded by the Chemical Heritage Foundation with further support from HIST's budget. The award ceased in 2009 when funding sources terminated.

Box 5 : Contains a description of the Edelstein Award, selection procedures, funding and a list of past award winners. Individual file folders contain both award nominations and winners. Box 5 also contains information on the HIST Award, which replaced the Edelstein Award.

Oral Histories

A number of oral histories were conducted by members of HIST for the Chemical Heritage Foundation (formerly CHOC, now the Science History Institute)

- 16/26A 1990 – Interview with Robert George Denkwalter, conducted by Leon Gortler, June 18, 1990, at Merck & Co., Inc., Rahway NJ.
 1992 – Interview of Ralph Franz Hirschmann, conducted by Leon Gortler for the Merck Archives, September 10, 1992, at the University of Pennsylvania.
 2000 – Letter from Merck Archivist to John Sharkey, concerning “who was first” in the effort to synthesize an enzyme, ribonuclease.

Joseph Priestley House

The JPH was the American home of Joseph Priestley (1733-1804) from 1798 until his death. The home has been a frequent place of celebration for the American Chemical Society; they commemorated the centennial and bicentennial of the discovery of oxygen gas by Priestley as well as the 250th anniversary of Priestley's birth.

Mission Statement

(See under Strategic Planning)

National Historic Chemical Landmark Program

The National Historic Chemical Landmarks program was launched by the American Chemical Society in 1992 and has recognized more than 60 landmarks to date (through 2011). The program celebrates the centrality of chemistry. The designation of seminal achievements in the history of

chemistry demonstrates how chemists have benefited society by fulfilling the ACS vision: Improving people's lives through the transforming power of chemistry. Members of HIST were instrumental in forming this program, and many continued to serve on the program throughout the years. John B. Sharkey, HIST Archivist, donated a complete set of Landmark program booklets (through about 2010) to the Othmer Library of the Chemical Heritage Foundation.
